### LG Chiller History

LG is leading the chiller market with long experience of manufacturing chiller and advanced technology.

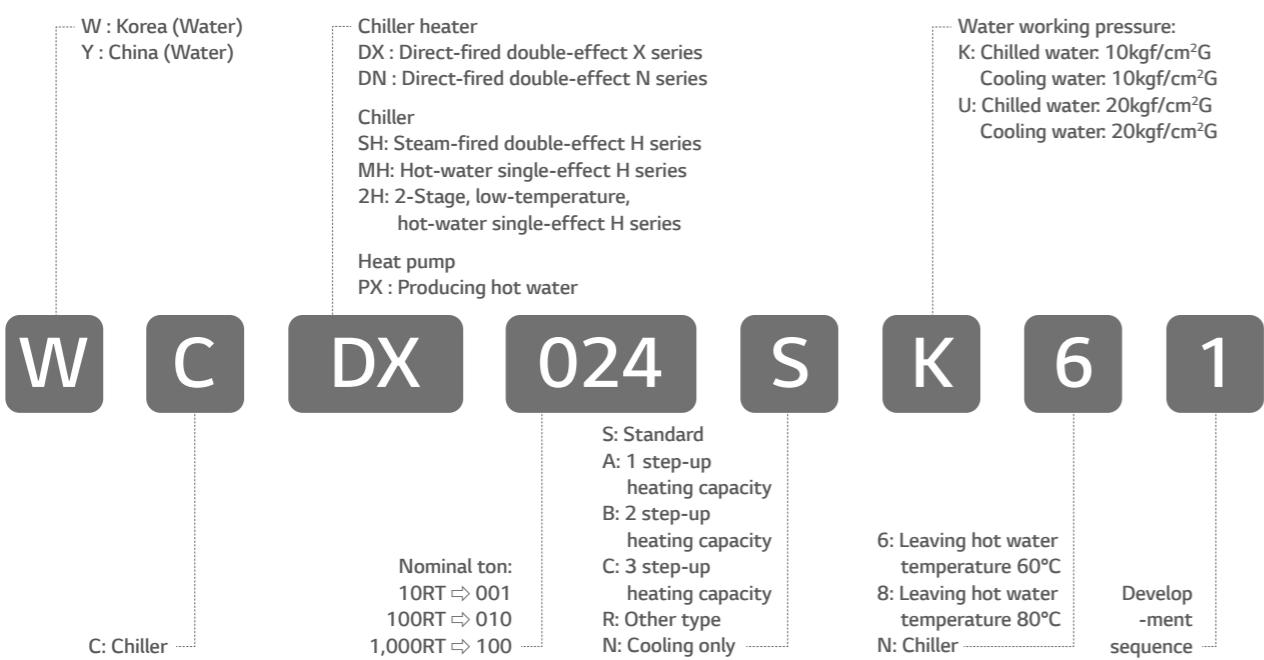

### Line-up

Model	100	500	1,000	1,500	2,000	2,500	3,000	4,000
Direct Fired Absorption Chiller & Heater (X Series)	100		1,500				3,000	
Direct Fired Absorption Chiller & Heater (N Series)	100		1,500				3,000	
Steam Fired Absorption Chiller	100		1,500				4,000	
Hot Water Driven Absorption Chiller	80		1,490	2,000				
Hot Water Driven Absorption Chiller	80		1,450	2,000				
Hybrid Absorption Chiller & Heater (WCHA)	100		1,500		3,000			
Absorption Heat pump (WCPX)	349 kW				Heating Capacity			30,218kW

\* Available on request.

### Nomenclature

### Application

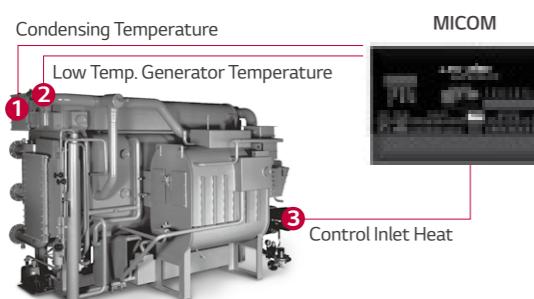

Energy	Available	Model Selection			(Example) Application
		Efficiency	Model	Remark	
Gas or Oil	LNG LPG Bio-Gas Exhaust gas Oil	COP 1.51 (IPLV 1.70)	WCDX YCDX	World Class High Efficiency Enhanced Partial Load Efficiency	Commercial area Multipurpose building Thermoelectric power plant
		COP 1.41	YCDN	Enhanced Efficiency of the part load (Part load : 75-25%)	
Steam	Steam pressure 4-8kg/cm <sup>2</sup>	COP 1.51 Consumption (3.5 kg/hRT)	WCSH YCSH	World Class High Efficiency	Commercial area Multipurpose building Petroleum and Chemical Factory
Hot Water	Inlet Temperature Standard 95°C	COP 0.83	WCMH YCMH	World Class High Efficiency Standard outlet Temp. : 80°C	Solar system District energy system Cogeneration
		COP 0.73	WC2H YC2H	Low Temperature outlet Standard outlet Temp. : 55°C	
Multi heat source	Exhaust gas + Hot water + (LNG)	COP 1.2	WCHA	Hybrid Absorption Chiller Using more than 2 kinds of heat source	Combined Heat and Power District energy system
Waste heating Source	Gas Steam Hot water	COP 1.65-1.80	WCPX	World Class High Efficiency Hot water Temp. : 55-90°C	Combined Heat and Power Incinerator system

\* Gas Calorific Value : 9,360 kcal/Nm<sup>3</sup>

### LG Chiller & Heater X-type (IPLV 1.70)

#### Absorbent Concentration Control

- Crystallization prevention control
- Precision temperature control using PID control

#### User Friendly Controller

- LCD display : easy to check status
- Various control functions

#### Marine Type Water Box

- Simple & convenience
- pipe cleaning

#### Auto Purge System (Option)

- Oil separator for protecting machine
- Absorbent separator for protecting vacuum pump

#### Series Solution Flow

- Inverter pump : easy & reliable flow control
- Simple piping line : maintenance convenience

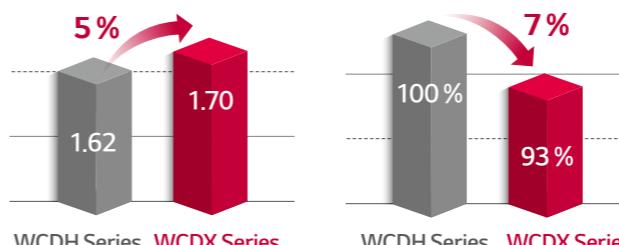

Inverter pump

### High Efficiency

LG chiller achieves IPLV 1.70 through cycle optimization design.

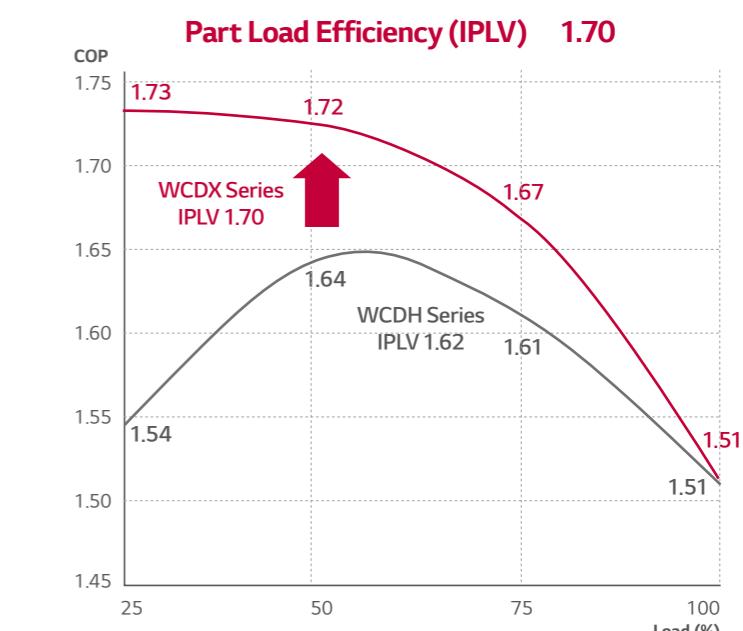

#### Part Load Efficiency (IPLV)

#### Operation Cost

#### Part Load Curve

Note:

\* IPLV (or NPLV) =  $0.01A + 0.42B + 0.45C + 0.12D$

\* Based on KS B 6271 Standard

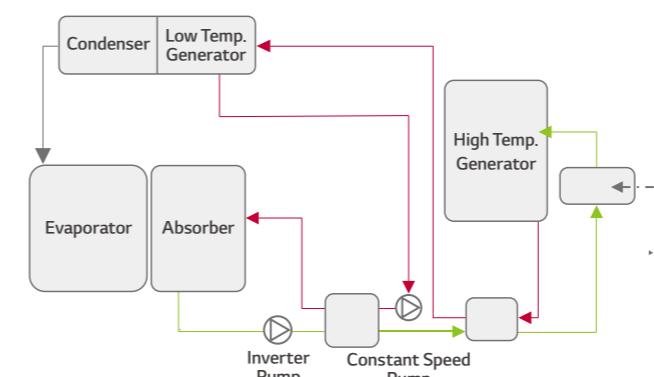

Apply to all inverter absorbent pump has improved part-load efficiency.

#### WCDH / WCDN Series

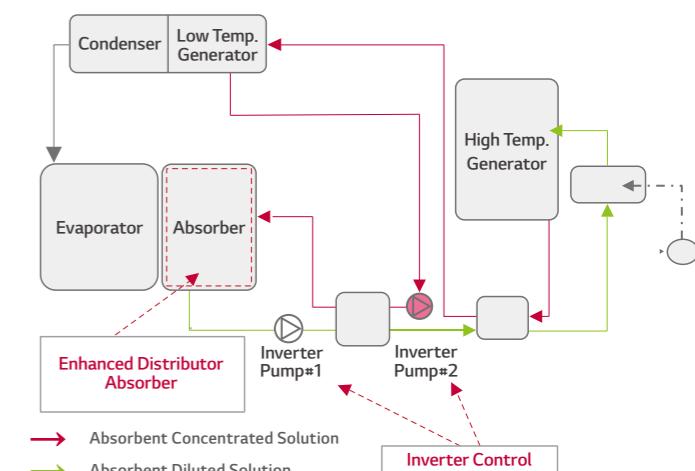

- Absorbent pump #1 Inverter control
- Absorbent pump #2 constant speed operation
- Soft start/stop by inverter

#### WCDX Series

- Absorbent pump #1, #2 Inverter control applied
- Improved efficiency during partial load operation (applied logic for partial load only)
- Soft start/stop function expanded

→ Absorbent Concentrated Solution  
→ Absorbent Diluted Solution

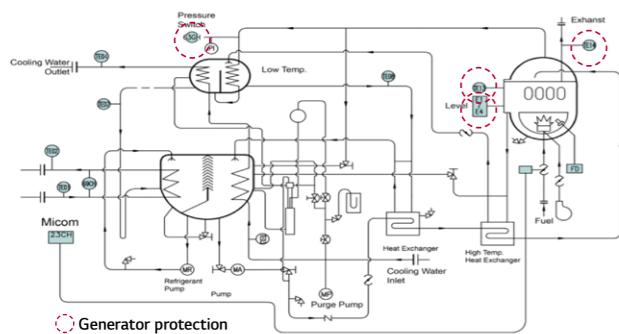

→ Absorbent Concentrated Solution  
→ Absorbent Diluted Solution  
Inverter Control

### Safety Function

LG chiller protect itself through various sensors and logic.

#### Overload of Heat Source Prevention

#### Equipment

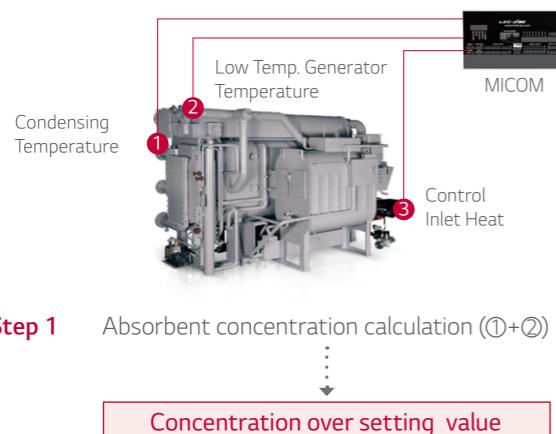

- TE13-14 : Temp. sensor Solution temp. measuring
- E1~4 : Level sensor Solution level measuring
- 63GH : Press. switch High gen. Pressure measuring

#### Function

- High temp. generator protection
- Control of amount of Input heat source
- Prevention of secondary accident (caused by high temp./pressure)
- Constant performance by absorbent level control
- High temp. generator/exhaust gas temp. check

LG chiller operates stably through crystallization prevention system (During operation and power failure).

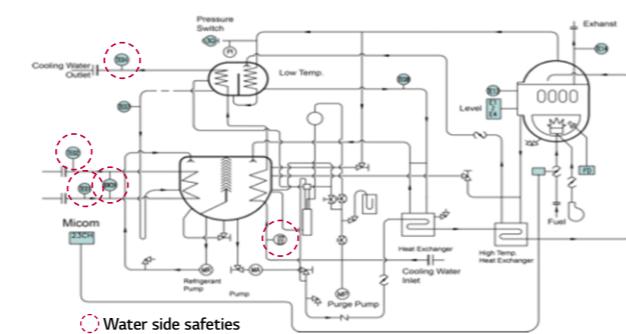

#### Absorbent Concentration Control

- Step 1** Absorbent concentration calculation (①+②)  
Concentration over setting value

- Step 2** Control program start (③)  
Crystallization prevention control

#### Anti-Freezing Protection

#### Equipment

- TE01-04 : Temp. sensor Water temp. measuring
- 69CH : Press. switch Water flow detecting

#### Function

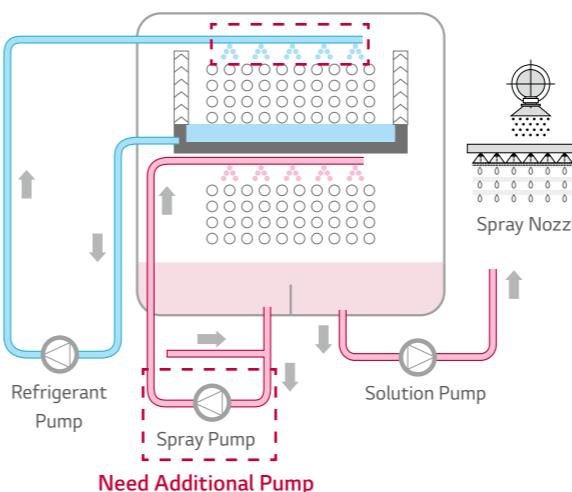

- Anti-freezing protection
- Cooling load control
- Cooling tower load control
- Chilled water, Cooling water inlet/outlet temp. check

### Gravity Loading Dropping

Compared to the spray method, LG chiller has less blocking of nozzle holes, which improves reliability.

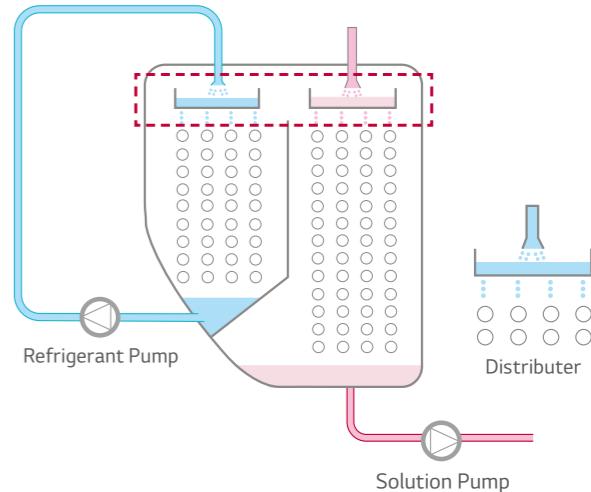

#### Spray Nozzle Type (Other Co.)

- Additional spray pump is required
- Nozzle might be blocked by sludge

#### Tray Type (LG)

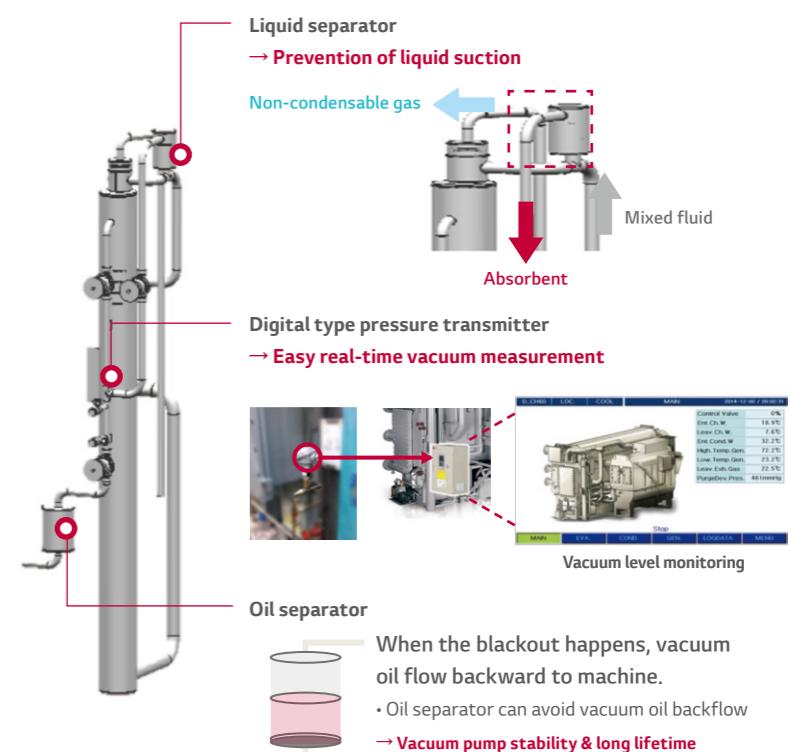

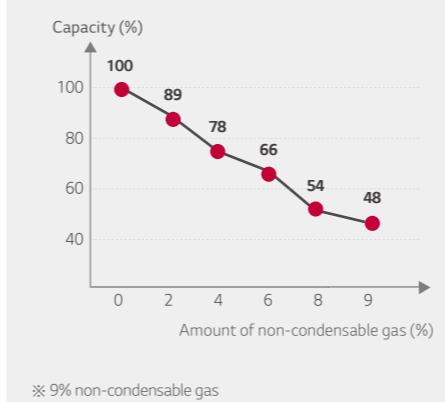

- Not required spray pump for dropping
- No risk to have sludge in the hole
- Gas & liquid separation technique enhances distribution

### Auto Purging System (Option)

Maintain stable vacuum condition by avoiding liquid carry over and oil backflow when blackout or emergency stop occur.

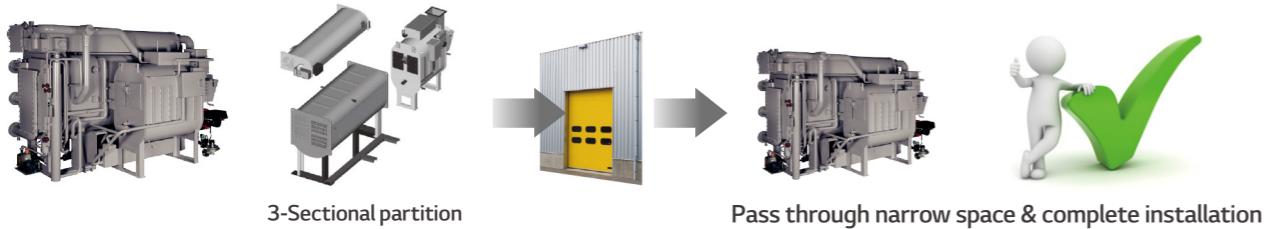

#### Capacity According to the Amount of Non-Condensable Gas

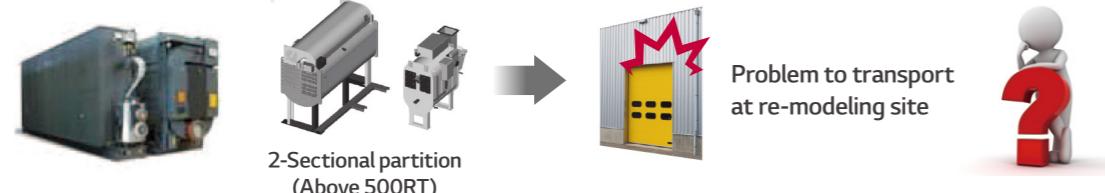

### Multi-sectional / Convenience

Multi-sectional shipment provides transport convenience that can carry parts through the narrow passage.

#### LG Chiller

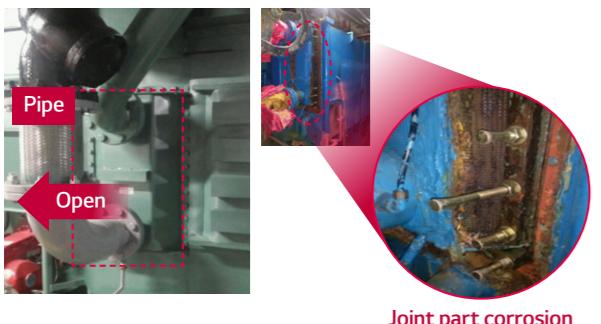

#### Other Company

Tube cleaning is more rapid, simple and cost saving without the pipe fitting disassembly.

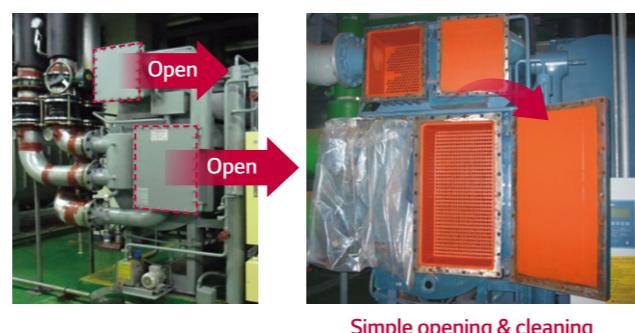

#### Other Company

- Water Box on the front
  - For cleaning, opening the lid causes disassemble pipe and insulation
  - Joint part corrosion due to periodic disassemble  
→ Complicated, Time-consuming

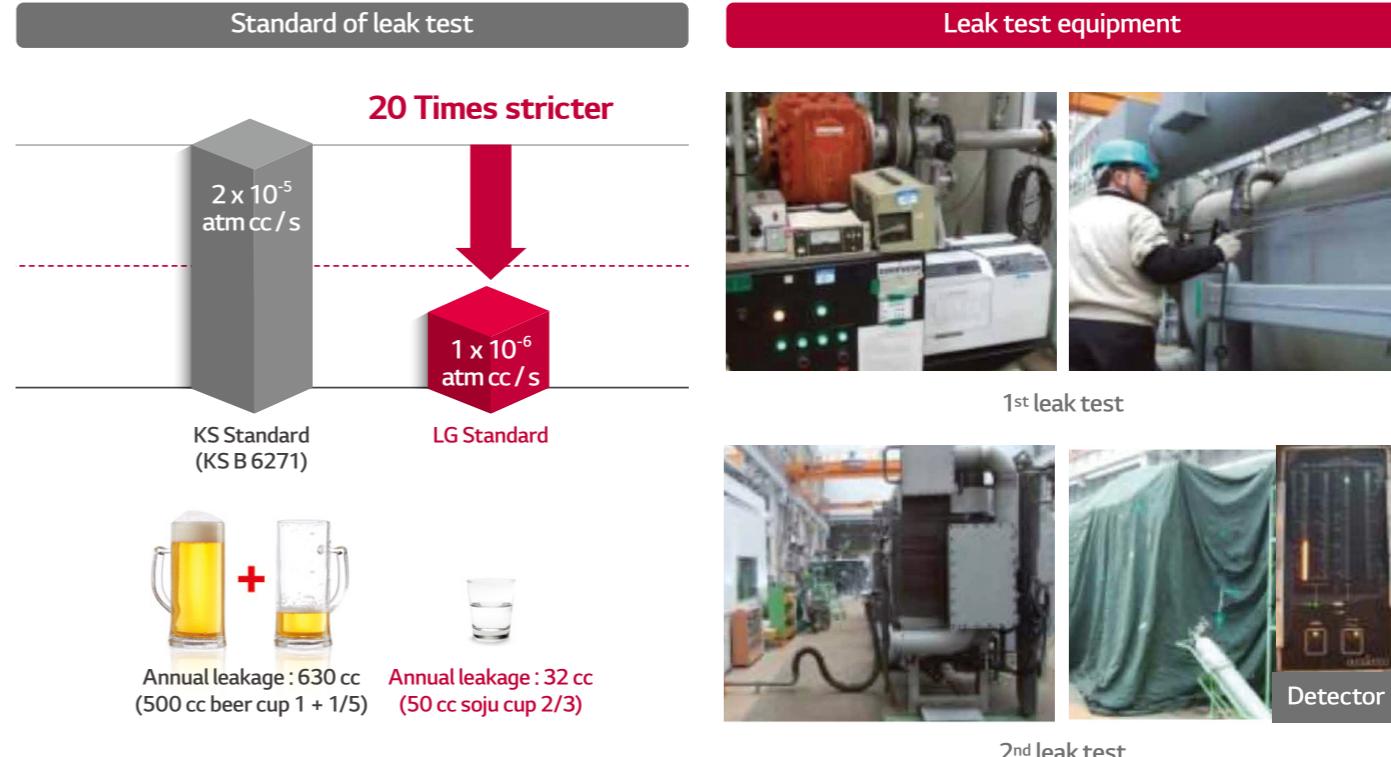

#### LG

- Water Box on the side (Marine Hatch Type)
  - For cleaning, just water box cover can be opened
  - Do not need disassembly of pipe and insulation  
→ Simple, Convenience

### Leak Test / Reliability

Strict helium (He) leak test for two times ensures the industry's highest reliability.

### Tube Material

Part	Material			
	Direct Fired	Steam Fired	Hot Water Driven (MH-type)	Hot Water Driven (2H-type)
Lower Unit	Evaporator Tube		Copper	
	Absorber Tube		Copper	
Upper Unit	Condenser Tube		Copper	
	Generator Tube		Copper	
High Temp. Unit	Aux. Absorber Tube	-	-	Copper
	2nd Generator Tube	-	-	Copper
Upper, Lower High temp. Unit	High Generator Tube	Carbon Steel	Stainless Steel	-
	1st Generator Tube	-	-	Copper
	Aux. Generator Tube	-	-	Copper
	Condenser Tube	-	-	Copper
Upper, Lower High temp. Unit	Shell		Rolled Steel	
	Tube Sheet		Rolled Steel	
	Eliminator		Stainless Steel	
	Water Box		Rolled Steel	
	Pipings		Carbon Steel	

※ Heat exchange tube requires periodic cleaning (To prevent efficiency decrease and pipe blocking)

### WCDX Series

Model	Unit	WCDX010A	WCDX012A	WCDX015A	WCDX018A	WCDX021A	WCDX024A
Cooling Capacity	usRT	100	120	150	180	210	240
	kW	352	422	527	633	738	844

Note:

1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h

2. Standard Fouling factor of Chilled & Cooling water : 0.086m²K/kW (0.0001 m².h.°C)

3. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)

4. Standard gas pressure : 4,000mmAq

5. Recommend Gas pressure : Low Pressure 200mmAq, Mid. Pressure 900mmAq, High Pressure 4000mmAq

6. Standard low calorific power : 9,360 kcal/Nm³

7. Power supply wire size is based on the due of metal conduit and 40°C of ambient temperature.

8. Total Shipping Weight include weight of the burner & liquid.

9. The specifications are subject to change without prior notice.

10. For other than above this table, contact nearest LG Electronics office.

Note:

1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h

2. Standard Fouling factor of Chilled & Cooling water : 0.086m²K/kW (0.0001 m².h.°C)

3. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)

4. Standard gas pressure : 4,000mmAq

5. Recommend Gas pressure : Low Pressure 200mmAq, Mid. Pressure 900mmAq, High Pressure 4000mmAq

6. Standard low calorific power : 9,360 kcal/Nm³

7. Power supply wire size is based on the due of metal conduit and 40°C of ambient temperature.

1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h

2. Standard Fouling factor of Chilled & Cooling water : 0.086m²K/kW (0.0001 m².h. °C)

3. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)

4. Standard gas pressure : 8kg/cm²G (785kPa)

5. Power supply wire size is based on the due of metal conduit and 40 °C of ambient temperature.

6. Total Shipping Weight include weight of the burner & liquid.

7. The specifications are subject to change without prior notice.

8. For other than above this table, contact nearest LG Electronics office.

Note:

1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h

2. Standard Fouling factor of Chilled & Cooling water : 0.086m²K/kW (0.0001 m².h. °C)

3. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)

4. Standard gas pressure : 8kg/cm²G (785kPa)

5. Power supply wire size is based on the due of metal conduit and 40 °C of ambient temperature.

6. Total Shipping Weight include weight of the burner & liquid.

7. The specifications are subject to change without prior notice.

8. For other than above this table, contact nearest LG Electronics office.

Note:  
1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h

2. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)  
3. Alternate cooling water temperature range available upon request.

4. Power supply wire size is based on the due of metal conduit and 40°C of ambient temperature.  
5. The specifications are subject to change without prior notice.  
6. For other than above this table, contact nearest LG Electronics office.

Note:  
1. 1usRT = 3,024kcal/h, 1kW = 860kcal/h  
2. Standard Tube and Water Side Pressure(Chiller & Cooling Water Circuit) : 10kg/cm²G (981kPa)  
3. Alternate cooling water temperature range available upon request.

4. Power supply wire size is based on the due of metal conduit and 40°C of ambient temperature.  
5. The specifications are subject to change without prior notice.

WCDX150S / YCDX150S	6,200	4,600	21.8	7.9	18.6	70.1

- Note:
1. The foundation and the floor must be sufficiently strong to support the unit weight.
  2. Provide a flow drain near chiller foundation.
  3. Only if foundation anchoring is required, anchor bolts, nuts and washers, shall be supplied together with chiller. Anchor bolts must be fixed on the foundation prior to chiller installation.
  4. Unit must be leveled before startup.  
(Horizontal level must be below than 2mm/1,000mm).

WCSH150 / YCSH150	6,571	3,020	29.3	29.3	58.6

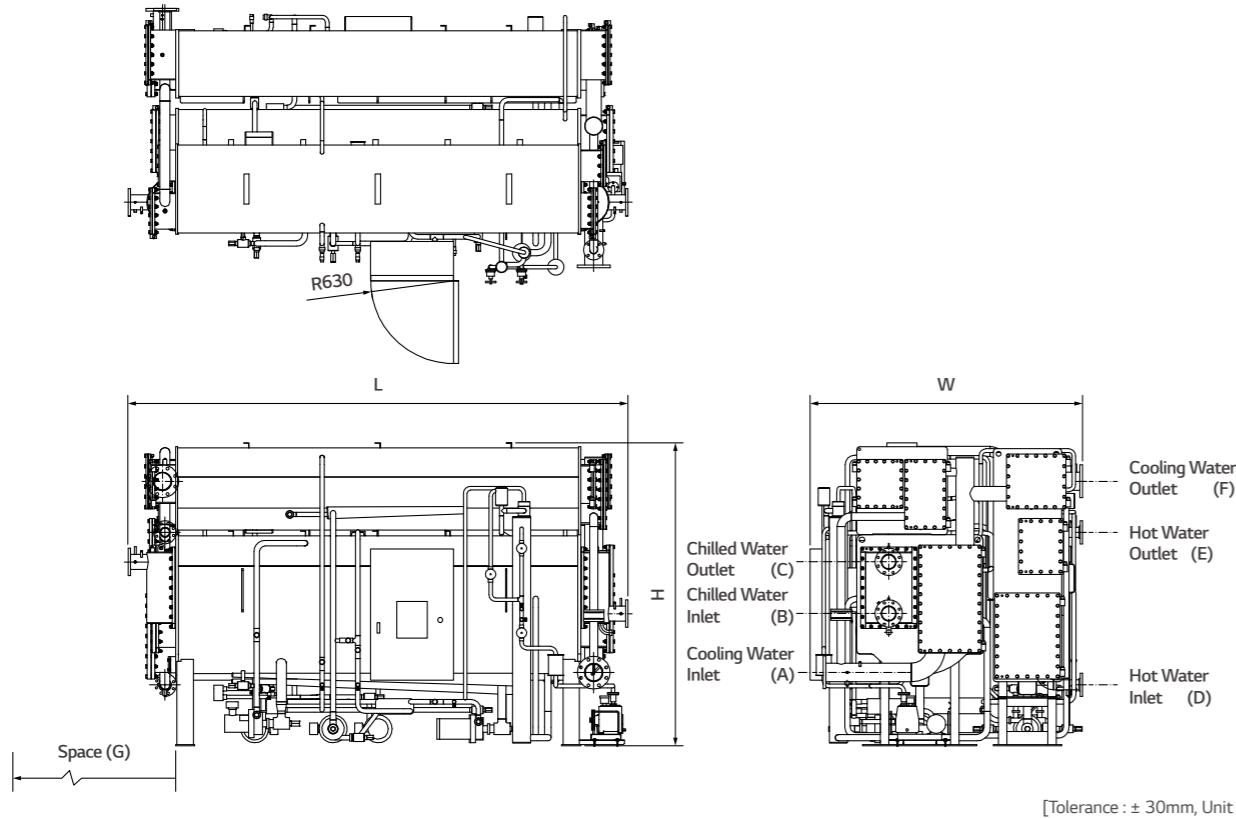

- Note:
- The foundation and the floor must be sufficiently strong to support the unit weight.
  - Provide a flow drain near chiller foundation.
  - Only if foundation anchoring is required, anchor bolts, nuts and washers, shall be supplied together with chiller. Anchor bolts must be fixed on the foundation prior to chiller installation.
  - Unit must be leveled before startup.  
(Horizontal level must be below than 2mm/1,000mm).

Note:

1. Installation and service clearance as follows :

Length direction - 1,000 mm Top - 200 mm  
Control panel side - 1,200 mm Etc. : 500 mm

2. Please refer to the LG Electronics drawings for the piping direction.

## Hot Water Driven Absorption Chiller Foundation (MH Type)

[Tolerance : ± 30mm, Unit : mm]

Model	Dimension					Weight (kg)

WCMH135 / YCMH135	7,170	5,730	720	4,230	28.5	28.5	57.0	

Note:

1. The foundation and the floor must be sufficiently strong to support the unit weight.

2. Provide a flow drain near chiller foundation.

3. Only if foundation anchoring is required, anchor bolts, nuts and washers, shall be supplied together with chiller. Anchor bolts must be fixed on the foundation prior to chiller installation.

4. Unit must be leveled before startup.  
(Horizontal level must be below than 2mm/1,000mm).

### Heat / Cold Insulation Work

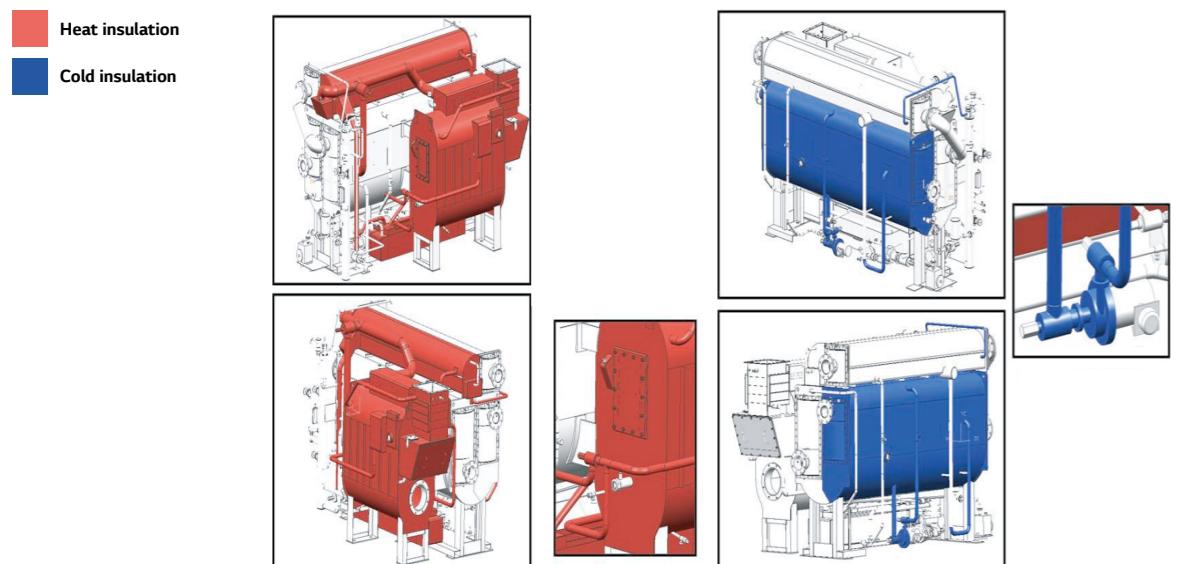

LG Electronics does not perform heat/cold insulation work to the product when delivering the product.

Perform heat/cold insulation work before trial operation after the leakage test on the site.

Perform heat/cold insulation work based on the standard heat/cold insulation work guideline.

#### Precautions on Heat / Cold Insulation Work

- 1) Make sure that there is no gap between the heat/cold insulator and body, heat/cold insulator and exterior material.
- 2) Do not allow any open gaps in the connection areas of the heat/cold insulator.
- 3) In case of using two layers of heat/cold insulator, the joints should not be in the same position.
- 4) Do not let water or moisture get into the heat/cold insulation.
- 5) Consider expansion or contraction.
- 6) As shown in the picture for detailed work, the structure of the parts requiring inspection should allow the parts to be separated without damaging the heat insulator.

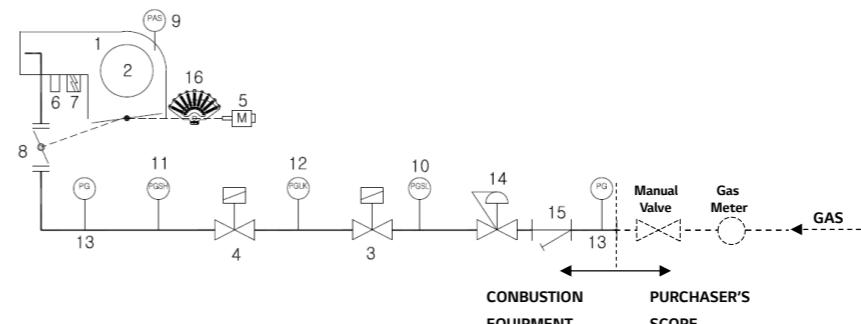

Classification	Specifications	Note
Direct Fired	Heat Insulation Glass Fiber (Glass Wool) : Thickness 25mm, 75mm, density 24 Kg/m³ or more	For exterior finishing, galvanized steel sheet with a body size of 0.45mm or more and a pipe of 0.3mm or more should be used. (When using aluminum plate, the thickness is more than 0.6mm)
	Cold Insulation Rubber foam (NBR) : Thickness 19mm, density 40 kg/m³ or more, black	-
Steam Fired	Heat Insulation Glass Fiber (Glass Wool) : Thickness 25mm, 75mm, density 24 Kg/m³ or more	For exterior finishing, galvanized steel sheet with a body size of 0.45 mm or more and a pipe of 0.3mm or more should be used. (When using aluminum plate, the thickness is more than 0.6mm)
	Cold Insulation Rubber foam (NBR) : Thickness 19mm, density 40 kg/m³ or more, black	-
Hot Water Driven	Heat Insulation Rubber foam (NBR) : Thickness 19mm, density 40 kg/m³ or more, black	All thermal insulation can be used in glass fiber (Glass Wool) : Thickness 25mm, density 24 Kg/m³ or more.
	Cold Insulation Rubber foam (NBR) : Thickness 19mm, density 40 kg/m³ or more, black	-

### Water Quality

If bad quality water is used in the chiller-heater, it will produce scale in the tube lowering the performance and efficiency of the chiller-heater and further cause corrosion and rupture, finally shortening the life of machine.

Water quality control and regular inspection on the heat transfer tube and tube cleaning are needed.

On the other hand, if make-up water of cooling water is mixed with purified water or the cooling tower is installed in an air polluted place around chimney, water quality will be getting worse. Especially when concrete heat reservoir is used, bad scale will be caused by compounds of calcium. Be very cautious of this.

### Standard of Water Quality

Category	Cooling water		Chilled/Hot water		Trend	
	Circulating cooling water	Make-up water	Circulating Chilled/Hot W.	Make-up water	Corrosion	Scale Production
PH (25°C)	6.5 ~ 8.0	6.5 ~ 8.0	6.5 ~ 8.0	6.5 ~ 8.0	0	0
Conductivity (25°CµS/cm)	below 800	below 200	below 500	below 200	0	
M Alkaline (PPM)	below 100	below 50	below 100	below 50	0	
Total Hardness (PPM)	below 200	below 50	below 100	below 50	0

Note:

- PF Condensor (Power Factor Condensor or Phase Advanced): Device that reduces reactive power.
- Solution Filter : The purpose is to remove corrosion contaminants by using filters and obtain effects such as energy saving, extension of chiller life, and ease of management.
- Isolation Valve : To offer service easily, it is installed isolation valve in absorbent pump and refrigerant pump inlet/outlet.
- Standard Spare Parts for abroad : Gravimeter 1set, Hydro Cylinder / Bushing / Hose Rubber / Spanner (8inch) - each 1ea, Fuse 2ea, Vacumm Pump Oil 2L

Note:

- As any of items in the table has a large influence on inclination of scale or corrosion, if any item is over the standard value it will increase the possibility of scale or corrosion, a regular inspection is required. (Once a month)
- There is no guarantee about the rupture caused by corrosion of the pipe due to insufficient water quality management of the water system and the deformation and contamination of the chiller caused by the inflow of water inside the equipment.
- Available water quality varies depending on the chemicals used for water handling, thus consult with a company specialized in water handling to perform water quality control at regular intervals with a proper standard.
