

LG COMMERCIAL LAUNDRY

QUALIFIED ENERGY STAR®

TOP-MOUNTED DISPENSER

AUTO DOSING INTERFACE READY

**GIANT-C
WASHER**

INVERTER DIRECT DRIVE™

Unlike the traditional belt and pulley system, the LG commercial laundry drum is directly attached to the motor providing superior durability and reliability. Fewer parts equals fewer repairs.

DD Motor

Drum

ATOMIZING SYSTEM

The Atomizing nozzle sprays fresh water onto the clothes and the door. This helps produce a rapid fill so clothes are soaked sooner and longer providing a better washing performance. It also cleans the door glass every time the water sprays on it, reducing your burden of cleaning any excess soap residue.

CUSTOMIZED CYCLES

Users can design their own cycles, selecting washing time, rinse time, water level, etc. and save up to 20 wash cycles to provide optimized washing performance.

MULTI HEAT TREATMENT

To ensure superior performance LG heat treats the shaft which connects our drums and motors. This protects against gradual wear and tear.
