Intelligent Cooling, Perfectly Tuned

From room-to-room temperature syncing to energy-optimized performance, smart cooling transforms your home into a haven of quiet, adaptive comfort.

Soft Air Mode and Faster Cooling

Dual Vane design for faster, more cooling and more precise airflow. By adjusting air speed and temperature, Soft Air mode gently circulates cool air throughout the room—without direct blasts. When activated, the bottom vane closes to create a comfortable, indirect flow from ceiling to floor.

Energy Control with AI KW Manager

Easily manage your electricity usage with planned, proactive energy control. Take complete control of cooling your home and set achievable energy consumption limits.

Energy Saving with Window Open Detecting

Keep your air conditioner running while circulating air efficiently. A built-in sensor detects open windows and automatically activates Energy Saving Mode, helping reduce power usage without lifting a finger. This helps reduce electricity waste by preventing unnecessary cooling.
